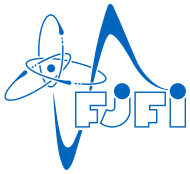
General Framework for Classicifcation at the Top

Dissertation



Author: Ing. Václav Mácha
Academic year: 2021/2022

Poděkování:

Thanks thanks

Čestné prohlášení:

Prohlašuji na tomto místě, že jsem předloženou práci vypracoval samostatně, a že jsem uvedl veškerou použitou literaturu.

V Praze dne 1. prosince 2021

1 Introduction

Many binary classification problems focus on separating the dataset by a linear hyperplane $\boldsymbol{w}^\top \boldsymbol{x} - t$. A sample $\boldsymbol{x}$ is deemed to be positive or relevant (depending on the application) if its score $\boldsymbol{w}^\top \boldsymbol{x}$ is above a threshold t. Multiple problem categories belong to this framework:s
